

## 49922 to 49954—Continued.

**49934. CLEMATIS AETHUSIFOLIA Turcz. Ranunculaceæ.**

A free-growing deciduous climber from China, 5 to 6 feet high, with densely tangled slender stems and finely divided foliage. The attractive pale-yellow blossoms are produced profusely.

**49935. CLEMATIS FARGESII Franch. Ranunculaceæ.**

A 20-foot climber with white flowers which are 2 inches across in 3-flowered long-stalked axillary cymes.

**49936. CLEMATIS FUSCA Turcz. Ranunculaceæ.**

A semiherbaceous climber from northeastern Asia, with woolly reddish brown pitcher-shaped flowers. The seed vessels are covered with yellow-brown silky hairs.

**49937. CLEMATIS REHDERIANA Craib. Ranunculaceæ.**

A Chinese woody climber with pinnate chartaceous leaves which are pale beneath and compact axillary panicles of flowers. The sepals are 1.7 centimeters long, reflexed at the tip, pilose on the outer surface, smooth on the inner. (Adapted from *Kew Bulletin of Miscellaneous Information*, 1914, p. 150.)

**49938. CLEMATIS VEITCHIANA Craib. Ranunculaceæ.**

A Chinese woody climber with bipinnate chartaceous leaves and long lax axillary inflorescences of gracefully drooping flowers with ciliated sepals. (Adapted from *Kew Bulletin of Miscellaneous Information*, 1914, p. 151.)

**49939. DEUTZIA CORYMBOSA R. Br. Hydrangeaceæ.**

This pretty species has a special value by reason of its late, continuous flowering, being at its best in July and August, when the bush is covered with the corymbose clusters of pure-white flowers not far removed in form or purity of color from those of *Bouvardia jasminoides*. (Adapted from *Gardening Illustrated*, vol. 39, p. 501.)

**49940. DEUTZIA LONGIFOLIA Franch. Hydrangeaceæ.**

A deciduous shrub, 4 to 6 feet high, one of the handsomest garden plants of the genus. The young shoots are covered with a pale scurf and the leaves are whitish below. The rosy flowers, about an inch across, are borne in rounded cymose clusters 2 to 3 inches across. (Adapted from *Gardeners' Chronicle*, third series, vol. 51, p. 409.)

For previous introduction, see S. P. I. No. 42691.

**49941. DEUTZIA LONGIFOLIA VEITCHII (Veitch) Rehder. Hydrangeaceæ.**

This vigorous plant from Yunnan, China, has large, brilliantly colored, deep rose-lilac flowers, disposed in numerous little clusters the entire length of the branches.

For previous introduction, see S. P. I. No. 42691.

**49942. DEUTZIA MOLLIS Duthie. Hydrangeaceæ.**

A very distinct and beautiful species from central China. The white or pink-tinged flowers are in flat corymbose panicles. (Adapted from *Gardeners' Chronicle*, third series, vol. 40, p. 238.)

**49943. DEUTZIA SIEBOLDIANA Maxim. Hydrangeaceæ.**

The lowest growing of all the Deutzias, of a very compact habit. It has small white flower panicles which are not very conspicuous; but it is a very graceful shrub. (Adapted from *Gardening Illustrated*, vol. 39, p. 335.)
